# LIGHT BOXES

Light box signs are illuminated advertising or informational displays that use backlighting to draw attention and increase visibility. These signs consist of a translucent panel or box with built-in lighting elements, such as LED or fluorescent lights, positioned behind the display area. The lights illuminate the graphics, text or images displayed on the front of the panel, creating a vibrant and eye-catching effect. Light box signs are commonly used in various settings, including retail stores, restaurants, airports and outdoor advertising, to effectively showcase promotions, branding or important messages in a visually striking manner.

# FABRIC LIGHTBOX

A fabric light box is a display system that combines a tensioned fabric graphic with built-in illumination to create a visually captivating and vibrant signage solution. It consists of a lightweight aluminum frame that holds a tensioned fabric print, which is then evenly illuminated from behind using LED lights. The fabric used is typically durable and wrinkle-resistant, ensuring a smooth and seamless appearance. Fabric light boxes are widely utilized in retail stores, trade shows and other commercial environments to showcase products, promotions or branding messages with high visual impact and versatility.

**Ideal when you want to  
highlight the faint soft-  
ness of an image.**

# ACRYLIC LIGHT BOX

An acrylic light box is a display unit that utilizes a transparent acrylic panel to showcase graphics or promotional messages in an illuminated and visually appealing manner. It consists of a frame made of sturdy materials, such as aluminum or stainless steel, with a front panel made of acrylic. The result is a bright and vibrant display that enhances the visibility and impact of the graphics or messages showcased within the light box. Acrylic light boxes are commonly used in retail stores, restaurants and other commercial settings to attract attention.

**Thermosetting plastic with an excellent surface finish, flatness and being opaque it does let light pass.**

# FLEX LIGHT BOX

A flex light box is a dynamic and versatile display system that utilizes flexible materials, such as PVC or silicone to create a lightweight and bendable frame. This flexible frame is designed to hold a printed fabric graphic that can be easily inserted and changed as needed. The flex light box incorporates LED lighting technology to illuminate the fabric graphic, providing a bright and vivid visual presentation. Due to its flexibility, the light box can be curved, shaped or even suspended, allowing for creative and eye-catching installations. It is commonly used in retail environments, trade shows and events to showcase branding or advertising messages with a modern aesthetic.
